

Asset Tracking Application

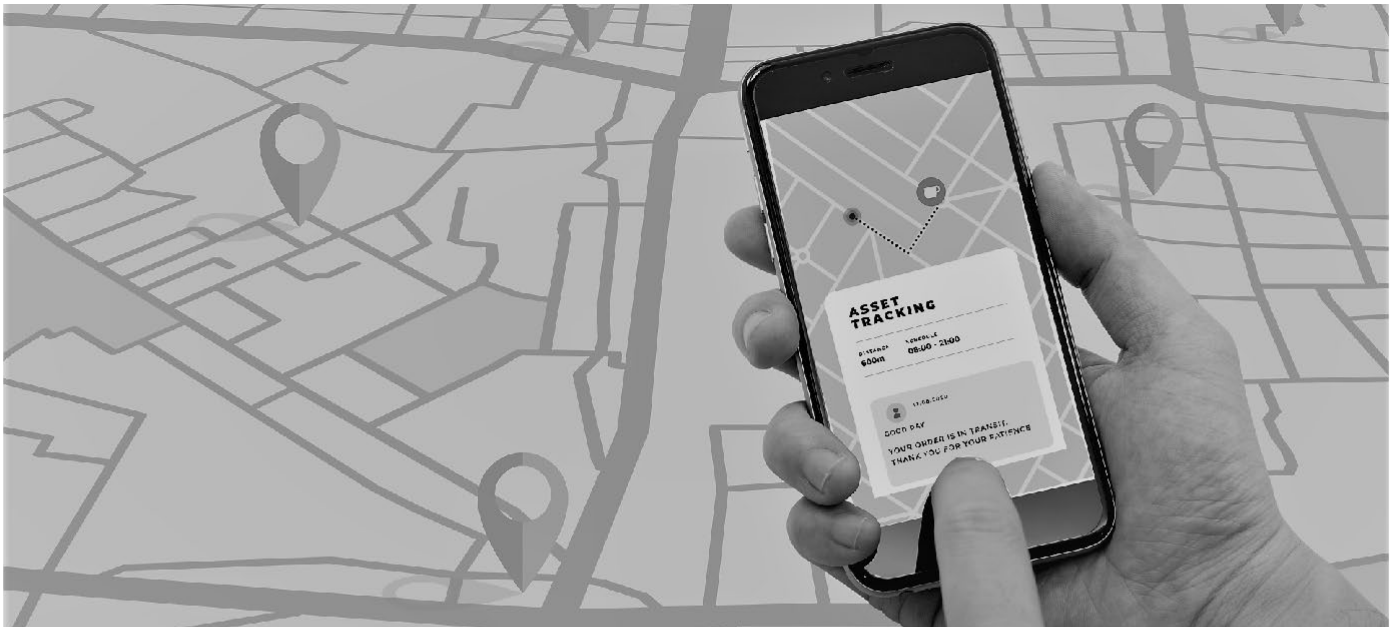

An asset tracking app that works on Android mobile devices.

The App is very user friendly. Simply send a link via sms or email and the user can track the asset. The link to the asset/vehicle being tracked expires once the user signs acceptance of the delivery.

App Features

- Minimum data band width required
- Track any moveable asset type like vehicles, equipment, personnel, etc
- Track between 5-24 hours
- No licence fee for the maps
- Optional access control
- Click link in email to open live tracking
- Track from mobile phone or desktop
- Signal/Tracking directly from mobile device
- Includes Estimated Time of Arrival (ETA)
- Integration capabilities with Accounting Systems or standalone asset tracker
