

Acumate Solutions Company Profile

About Us

Acumate Solutions specializes in providing agile business solutions for cloud-based ERP, infrastructure-as-a-service (IaaS), and data analytics tailored to meet the needs of medium to large enterprises.

Our comprehensive suite of solutions empowers customers to seamlessly deploy ERP systems and advanced dashboard data analytics across a range of environments, including on-premise, private, public, and hybrid cloud setups. By leveraging our solutions, clients benefit from heightened security measures, increased reliability, easily accessible data, and the cost efficiencies that come with economies of scale. Particularly, our advanced dashboard data analytics focuses on delivering pertinent and actionable operational insights to address immediate business challenges. This allows users to establish correlations and gain valuable insights without having to wait for pre-programmed reports.

Our Values

*Trust, Integrity, Loyalty,
Adding Value, and
Accountability*

Our Methodology

Our track record in delivering effective business solutions has garnered the trust of our esteemed clientele from diverse industries. Leveraging our extensive national presence, we have distilled this wealth of experience into our distinctive engagement methodology.

This methodology guarantees exceptional quality and tailored business solutions, precisely addressing the unique needs of each individual client.

Our Services

Management Consulting Services

Our team's extensive knowledge allows us to deliver tailored professional guidance that caters directly to your unique business needs, ensuring the successful fulfilment of all your requirements.

Business Analysis & Workflow

Business Analysis is a crucial practice that aids in driving organizational change. This involves identifying requirements and proposing effective solutions that benefit stakeholders significantly.

Project Management

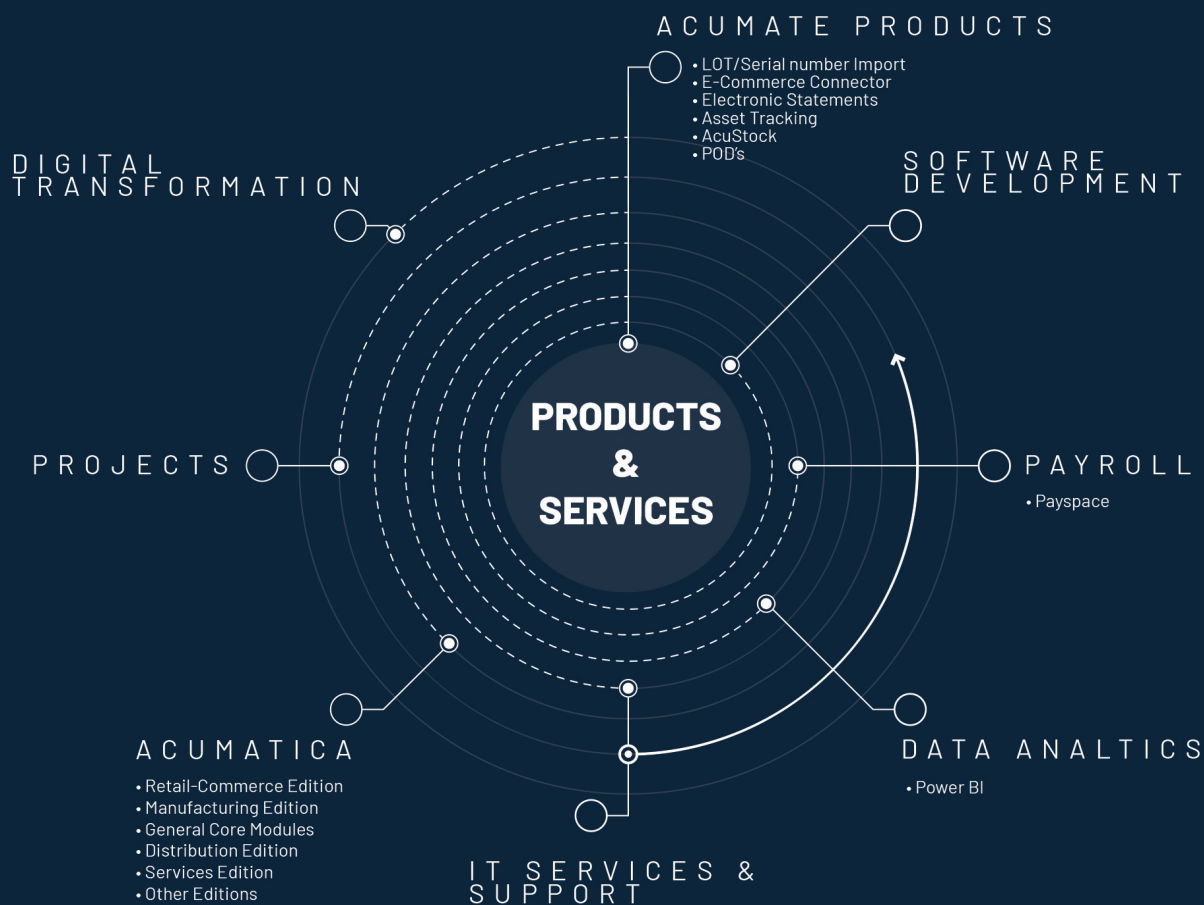

It is essential to conduct gap analyses to ensure the alignment between your business strategies and the existing solutions and systems. These analyses assist in identify the steps and requirements to implement the desired strategies.

Solution Specific Consultations

Our products offer unique attributes, and our skilled product consultants will provide comprehensive guidance to clarify their functionality and the reasons for their suitability for your organization.

Products & Services

Project Accounting

The Acumatica Project Accounting Suite enables seamless centralized management of budgeting, billing, and profitability for business ventures encompassing various employees, tasks, and materials.

This comprehensive solution empowers real-time reporting, consolidating project data into company-wide financial reports.

Project Management

Manage your projects and portfolios anywhere, anytime. With Project Portfolio Office (PPO), organizations can effectively manage projects and portfolios from any location and at any time.

This user-friendly and cost-efficient project portfolio management application offers configuration options while maintaining scalability for enterprise-level use. PPO enables organizations to plan, manage, collaborate, execute, and generate reports on their projects, programs, and portfolios, leading to increased project success.

Value Added Products

Our comprehensive range of solutions and services caters to the strategic functioning and financial success of your business, irrespective of its industry or scale. Our expert advisors are at your disposal to assist you in identifying the exact solution that suits your specific needs.
